

Basic maths taught

The Mathematics Club of Vignana Bharathi Institute of Technology — 'Ganith' — took their students to a Government High School in Nameragomula in Ghatkesar mandal where the first year B.Tech students taught the basic mathematical concepts like fractions, data handling, exponents and visualising 3D-2D figures to sixth grade students.

VBIT students even prepared some teaching aids that create interest in the students. The day ended with posing few questions on the concepts and giving prizes to the right answers. "This is an innovative practice taken up by the club," said the HoD, Dr. P. Kousalya.
