**XYLYX DAY**

## Indian Education System

Education in India has a history stretching back to the ancient urban centres of learning at Taxila and Nalanda. Western education became ingrained into Indian society with the establishment of the British Raj. The various articles of the Indian Constitution provide for education as a fundamental right. Most universities in India are Union or State Government controlled.

India has made a huge progress in terms of increasing primary education attendance rate and expanding literacy to approximately two thirds of the population. India's improved education system is often cited as one of the main contributors to the economic rise of India. Much of the progress in education has been credited to various private institutions.

Three Indian universities were listed in the Times Higher Education list of the world's top 200 universities — Indian Institutes of Technology, Indian Institutes of Management, and Jawaharlal Nehru University in 2005 and 2006. Six Indian Institutes of

Technology and the Birla Institute of Technology and Science - Pilani were listed among the top 20 science and technology schools in Asia by Asiaweek. The Indian School of Business situated in Hyderabad was ranked number 12 in global MBA rankings by the Financial Times of London in 2010 while the All India Institute of Medical Sciences has been recognized as a global leader in medical research and treatment. India's higher education system is the third largest in the world, after China and the United States.

Following India's independence a number of rules were formulated for the backward Scheduled Castes and the Scheduled Tribes of India.

As a part of the tenth Five year Plan, the central government of India outlined an expenditure of 65.6% of its total education budget of Rs. 438250 million, or on elementary education; 9.9% on secondary education; 2.9% on adult education; 9.5% on higher education; 10.7% on technical education; and the remaining 1.4% on miscellaneous education schemes.

" The purpose of education is to make the choices clear to people, not to make the choices for people."  
Peter McWilliams

# XYLYX'10

*"Men love to wonder, and that is the seed of science--Ralph Waldo Emerson"*

XYLYX 2010, is the most successful annual technical festival of **Vignana Bharathi Institute of Technology**, one of the leading engineering colleges in Andhra Pradesh. It is a three-day event that brings in several hundreds of students across the country. Science has been into the picture since the origin of this planet and that's what has kept man wondering, man has always been in pursuit of developing new technology to improve the standards of living to make this world a better place to live. Technology has influenced our lives to a great extent; it is in such a state that getting it out of the routine is out of the question. As to match the pace with the Advancing technology, XYLYX is a confluence of ideas from across the country. XYLYX plays host to a technical fest that showcases the modern developments in day to day technology. XYLYX aims at being a center for technical information exchange by inviting student from across the country to present their papers, share ideas and participate in a variety of events, and also it gives them an opportunity to display ones own creation by showcasing them in the "exhibition" section of the event. We endeavor to maintain the standards right from the judges to the events conducted to the judges. It is the state of the art technical fest of VBIT, conducted on the backdrop and support of the VBIT's IEEE student branch, the most vibrant IEEE student branch of Hyderabad. It hosts a galaxy of events aimed at boosting the technical and managerial skills which are inherent in today's students and provides them with an opportunity to showcase their conceptual depth, innovative ideas and presentation skills. The events at XYLYX 2010 are mainly aimed at improving the employability of students and prove to be the ultimate test of grit, knowledge and skill providing a perfect platform for the best brains to interact and compete with each other. XYLYX 2010 has a rich mix of technical as well as non-technical events, so there is always something for everyone.

Some of our major technical events constitute "**Thesis**", a paper presentation competition "**congreano**", a poster presentation competition, "**Envision**", a project presentation competition, attracting several participants from all over the country. For all those brainy people and technocrats, who love quizzes, "**Brainiac**" tests the wits at almost everything technically possible. C and C++ programming lovers, have, "**Codex**" the one of its kind Programming contest to test skills at programming.

Another enthusiastic section for all the technocrats, is "**Robotics**". It provides a unique platform for exploring skills at it. "**Automatons**", a typical robotics competition for all the robot-lovers to prove their mettle at robot making. "**Constrictors**", a survival of the fittest robot-competition, best for all those who fancy tearing their opponent robot into pieces." **Robo soccer**", gives a better experience of playing soccer with robots, and improve skills at soccer. "**Robo run**", is a typical robo race competition. Machines show brute force by pushing off opponent's machine out of the playing area, with "**Robo force**". And for all those who think that technical is not their

cup of tea, there is no disappointment even for a blink as, "**The lexicon challenge**", throw the challenge to test their vocabulary amongst the best. Popular public speaking events like **JAM session, debate, extempore** test talents at language, vocabulary and soft skill. As for all those game addicts, a galore of gaming events, "**Melt-Down**" gives an experience literally every challenging game possible now. Through "**NFS most wanted**" "**Counterstrike**", "**Cricket 2007**" etc. And for all the young entrepreneur brains, "**W: Street**", a mock stock market exchange game where every participant gets to buy and shares depending on its market value. If executive ability prominent in the makeup, "**You Manager- conceal**" is the one for you. For all those who treat photography to be their p

sion, here we have for you, our one of its kind photography competition, "**Eagle's Eye**". Giving all the Mov savvy fans a chance to strut their stuff with our Movie making event, through "**Final-cut**". It is precisely these reasons that XYLYX attracts students from the best colleges throughout India, and especially Hyderabad.

*Do you realize if it weren't for Edison we'd be watching TV by candlelight? ~Al Boliska*

## A word of gratitude!

We would like to take this opportunity to thank our sponsors. Without their support this event wouldn't be here, and we are very grateful to them.

We are extremely happy to have LVR infrastructures as one of our prime sponsors who could be certainly termed as "Builders of Modern India.". LVR infrastructures PVT. LTD are one among the very few leading infrastructure companies in India.

We are elated to have the UNITEDWORLD school of business to be one of our major sponsors for the event. United world school of business is one of the top Indian platforms to learn the global economic order. United world School of Business is well known to produce skilled management resources, trained to engage themselves with major global trends and new economic world order.

**\* COME, BE A PART OF THE REVOLUTION  
AND  
DISCOVER YOUR INNER BRILLIANCE.\***

## Successful Career-Successful Living

**Step 1:**  
Do we need exam?

An exam is a formal test of knowledge and skills  
Exams are a need of our society  
The fittest survives in this world  
Exams help us to select the fittest  
Exams are not hurdles but stepping stones to success  
Life is also an exam.  
Maintain a Small Note Book in your Pocket, Jotting down your destinations  
Maintain a dairy at your home pointing down your destinations

**Step2:**  
Where are you going?

Most people work without any goals  
To succeed, we must have goals  
We can have long term or short term goals  
Goals must be challenging, achievable, flexible and time bound  
We must remind our selves of our goals every day  
We must plan to achieve our goals

**Step 3 Motivation**  
All the great achievers are self Starters. (Thomas Alva Edison or Bill Gates). They know how to be motivated.

Motivation is the strong DRIVING FORCE.  
To be motivated, dream big, work hard and persevere.  
Be in harmony with your inner Self.  
Find out what motivates you best.  
Keep yourself in high level of motivation always  
Conti.....(in next issue)

**Prof. V.Anandam**  
**Head Of the Department, CSE**

Education makes machines which act like men and produces men who act like machines. ~Erich Fromm

**Red Tacton**

In an age, where information is being considered as the blood of this century, the very idea of transmitting such data or information to someone very specific sends these cold waves all around our body. With so many hackers

and other anti-social elements spreading all around the world, secure data transmission is considered to be a myth these days. With the recent technological advancements, success has been achieved to an extent in tackling the above stated issue.

One such solution to this issue are the "RED TAC-

TON" devices which are going to make their mark very soon. And when they are out, all the problems related to security, efficiency, reliability and high speed data transmission will be solved. Red Tacton is a new Human Area Network technology that uses the surface of the human body as a safe, high speed network transmission path.

Considering the possibilities offered by this technology, it's possible that in a few years time, we will be able to download a ring tone for our mobile phone simply by touching an advertising panel in the street and do much more just by the power of touching things, thanks to Red Tacton technology. visit: [www.redtacton.com](http://www.redtacton.com) for more details.

**RAMAKRISHNA (MBA-1st Year)**

**THE .com \$TORY!!**

The .com suffix might just be one of the commonest things you would come across in your daily life. However, did you know that March 15 marked the 25th anniversary of the registration of the first domain name ever?

Back in 1985, March 15 to be precise, a small computer manufacturer from Massachusetts, US quietly registered a domain name called Symbolics.com. Back then, it might have not even made it to the local newspaper as a small headline. However, 25 years and over 200,000,000 registrations later, Symbolics.com is in the headlines again for obvious reasons. While the com-

pany no longer exists, Symbolics.com is still live. The site was sold to its current owner, XF.com in 2009 and now serves as a blog.

The world today sees over 600,000 new domain registrations every single day! Back in the 80 s, the second domain name after Symbolics.com was registered a month later. By 1987, the number of domains had increased to 100. Most of the world's popular domain names didn't even exist back then. The Google's, Yahoos and the Facebook's are just a recent phenomenon. According to a latest ITIF study, the dotcom

domain contributes 400 billion dollars in annual economic activity. This is expected to rise to a staggering 950 billion dollars by 2020. VeriSign also has some interesting statistics about the type of dotcom in existence today. For example, 1.8 million dotcoms are e-commerce online business websites, 4.3 million are entertainment-related sites and 1.8 million sports-related sites, according to VeriSign. In all, there are about 10 million dotcoms.

The real danger is not that computers will begin to think like men, but that men will begin to think like computers. ~Sydney J. Harris

# NET TOP— NEXT GENERATION DESKTOP COMPUTER

Media Advertisement of Video-  
 an, Bollywood Multi Starrer Shah-  
 kh Khan says "Bada Hai to Behtar  
 hai" means "Big is better". But now  
 the things have totally changed.  
 Every thing is going to shrink. If we  
 are talking of gadgets earlier mobiles  
 were big in size to put them in  
 pocket, but now all the companies  
 are rushing to make a thinnest and  
 smallest mobile. Let's take the exam-  
 ple of Television earlier televisions  
 were big box type structure, but now  
 you are watching smallest and thin-

nest plasma TV. So how can a desk-  
 top pc escape from this transforma-  
 tion? Firstly Desktop PC has also  
 come with a new form of Laptop.  
 Laptop computers are becoming  
 popular in customers mind due to mo-  
 bility, style, battery backup and the  
 most important feature is its small  
 size and weight. But most of consum-  
 ers felt an experience gap between  
 Laptop and desktop. That's why  
 manufactures are trying to bridge this  
 gap by introducing a new Avtar of  
 desktop called "NETTOP". Net tops

are not a new thing but the condensed  
 version of desktop computers which  
 can performs all the operations in a  
 better way. Good news for you!!!!  
 Some of reputed companies are going  
 to introduce their Net tops in this  
 month. And in this race Asus, Lenovo  
 and Acer are the leaders. Let's catch  
 out to see who has the power to win  
 this race.

- R.Mounika Rao ( II CSE)

## BRACELET PEN DRIVE

An Italian Company Poland is going  
 to launch a Pen drive which can  
 be worn like a Bracelet. This  
 USB Flash 2.0 Pen drive will  
 work like a normal pen drive.  
 There is not need of any exter-  
 nal power or external program  
 to run this pen drive. Just plug n

play!!! This Pen drives is available in  
 Stylish floral design.  
 Floral designed pen  
 drives available in three  
 colors Red, white and  
 Black which is up to  
 8GB capacity. Till now  
 Company has not dis-

closed the actual specification and  
 price band. From design point of view  
 it is very attractive for Jewelers. More-  
 over there are great chances that this  
 type of bracelet chain will be available  
 in all leading jewelry stores.

- Srujan (II CSIT)

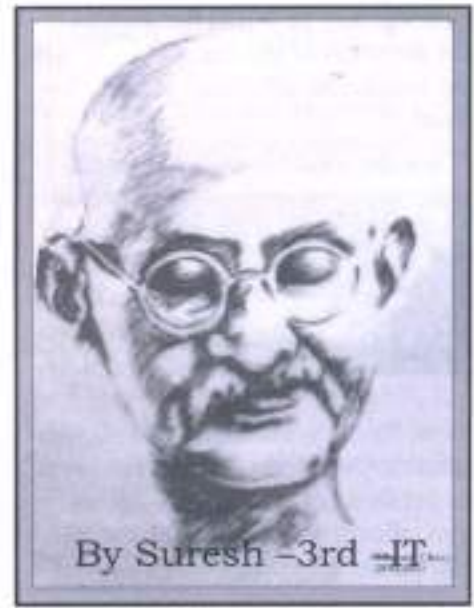

## GMAIL OVER RULES YAHOO MAIL !!

According to a survey of Vizisense  
 in this month, Gmail is the most  
 popular e-mail service in India.  
 Gmail breaks the 10 year record of  
 Yahoo Mail. It has been found that  
 18 million users were attached with  
 Gmail in September as yahoo mail  
 has only 16.8 millions in Septem-  
 ber. Google mail is increasing its  
 customer base month on month on  
 the other hand Yahoo email is on

declining  
 trend. In the  
 month of Sep-  
 tember month  
 Gmail gained  
 users from  
 17.7 million to 18 million while  
 Yahoo email loose from 18.2 mil-  
 lion to 16.8 million.

N.Varun Reddy (II CSIT)

If you think education is expensive, try ignorance. -Attributed to both Andy McIntyre and Derek Bok

# SIMPLICITY TOMORROW - SUSTAINABLE CITY LIGHT

Sustainable City Light transforms the personality of any community from industrial to ecological, harmonizing forces of nature and working with the planet, not against it. Sustainable City Light collects its own energy from the sun and wind by transforming its appearance throughout the day. At night, its efficient LEDs beam light only where needed - and only when needed - through proximity sensing.

**Day time - Harnessing renewable energy**

*When the sun shines...* As the sun shines, Sustainable City Light emulates nature's beauty to begin the

work of collecting solar energy. First, the 'petals' of its 'bud' open slowly. Much like a sunflower continues to face the sun while it moves from east to west during the day, Sustainable City Light's petals then gradually and continuously re-orient themselves in the direction of the sun, to face it with the maximum efficiency at each moment.

*When the wind blows...* The intelligent Sustainable City Light also takes advantage of cloudy, windy

days. As the wind starts to blow, Sustainable City Light intuitively moves its petals to an upward half-open position, allowing them to catch the wind. The petals then progressively rotate,

transferring the movement to the built-in rotor that instantly converts it into energy.

And when the sun shines again, Sustainable City Light adapts itself to the new weather. The device progressively stops rotating, and opens again to catch the sun rays.

*Collecting energy...* Whether storing energy for its own needs or feeding it back to the grid, Sustainable

City Light indicates the energy collecting flow on its 'trunk' through a decorative light feedback, further informing passers-by.

**Night Time - Light where it's needed, when it's needed** *When the night falls...* As day fades to night,

Sustainable City Light softly closes and transforms itself from a poetic power-generating landmark to a reassuring source of light. Its LEDs shine, lighting up with precision around its foot for safety and for the prevention of unnecessary 'light pollution'. The lamp format also allows passers-by to see the stars again.

*When people pass by...* When no one is around, Sustainable City Light glows at the minimum level

required for safety in its 'stand-by' mode. When people pass by, Sustainable City Light senses this movement and comes to life, increasing its intensity and bathing passers-by in comforting light.

**Zero consumption from the grid, ultimately leading to safety**

Sustainable City Light's LEDs use half of the energy of a traditional street light for the same light output. With its efficient, integrated solar cells and wind rotor, Sustainable City Light doesn't require power from the grid. It relies on itself, even through power shortages and other calamities. Sustainable City Light will keep shining at night.

**Whether 'Off-Grid' or 'On-Grid', a winning solution**

In remote areas, the self-sufficient Sustainable City Light doesn't require a power infrastructure. This makes it simple for rural communities to leapfrog into outdoor lighting without having to invest in a grid infrastructure, or for any architect or city planner to place lighting in areas they usually would not.

In urban areas, Sustainable City Light not only provides truly green lighting, but can actually supply power back to the grid when it overproduces electricity, making it a light pole that generates rather than consumes power.

**An investment in the aesthetic landscape**

Beyond landscape beautification, Sustainable City Light is a tool for forward thinking municipalities and other local authorities to show the world their commitment to a greener future.

**Hari Charan (MBA- Final Year)**

Real education must ultimately be limited to men who insist on knowing, the rest is mere sheep-herding. - Ezra Pound

# My thoughts on "What Makes A Good Lecturer?" .....

## If I should be a Lecturer.....

I'm going to hazard a guess here when I say I believe this to be a question most lecturers have asked themselves at some point during their teaching career. After all, it must be a considerable challenge to gauge how effective your lecture sessions are, based purely on the feedback provided by a handful of students' faces. Particularly if these are of the tired unre-sponsive' subset, of which I can certainly say I have contributed towards at some point over the past few years...

So is there some Secret Formula to being a good lecturer? Given the individuality of any single person, each lecturer will likely have their own way of presenting the material to the class - but this should not dictate whether a specific method is better than another. Some techniques that work well for certain lecturers may do nothing for others. I will therefore try to consider

vided  
handful  
students'  
Part-  
if these  
are of  
and

subset,

not only some useful practices, but also what I feel to be the main characteristics and personality traits that would justify a good lecturer.

I find one of the more beneficial aspects of a lecturer is to have a generally consistent routine. This would relate to such factors as showing up to the lecture at a given time, maintaining a certain amount of slide coverage per lecture, consistency in handout materials and so on.

Similarly, being able to correctly allocate time to a topic is another important skill for a lecturer to exhibit, as it will strengthen the students' confidence that all relevant materials will be covered prior to the exam.

For a lecturer to be passionate about the subject they teach is arguably the greatest trait of all.

It was fantastic to see a lecturer genuinely enjoying what he was doing, and passing on his knowledge of that field to a new generation.

Speaking of entertainment - making students laugh should definitely be applied as an aid during the lecture.

It should follow then, that good people skills are a virtue to be had in this field. Being able to communicate ideas effectively is essentially the whole point of lecturing! It would therefore make sense that a person be able to convey facts and thoughts to a classroom, in a friendly, approachable, and generally good-natured manner.

Likewise, in terms of a lecturer's undying passion for their area of study, this should be sufficient enough to draw in the audience and yet maintain a certain aura of self-control, so as to avoid tangential series of irrelevant information being thrown upon us during the middle of a particularly taxing learning outcome... As with most things though, in moderation, both humour and passion can be fantastic resources which may be used to boost student morale and maintain focus.

## EDU WORLD

Education decides about the future life and work for all;

Education only helps to develop one's life and work here.

Mere education is not passport to get job but it's for life;

Mere education helps not to face life situation or crisis;

Common sense, presence of mind, general knowledge do!

For everything education is the base in the modern world;

Education is for freedom, development and fulfillment in life;

Education helps intellectual mind to acquire true knowledge.

Knowledge only can give power, freedom and satisfaction;

Knowledge of love, truth gives freedom to attain perfection.

Dharma is justice to live righteous life according to one's nature;

Religion is to say about truth of God, dharma and culture to all;

Education is to help develop one's capacity with apt knowledge

To express talent using ideas of knowledge in duty to do things

Beneficial to oneself, society to

achieve joyful fulfillment in life!

purpose but crams knowledge  
Incomplete just to do specialized jobs

Now education does not serve such only for material benefits.

Complete knowledge makes link of science, and culture;

This could satisfy body, mind, heart and soul to achieve completion;

Love and knowledge make perfect to attain joy, peace, satisfaction!

-Diksha Mundhra (Ist -CSE)

My idea of education is to unsettle the minds of the young and inflame their intellects. -Robert Maynard Hutchins

# Thoughts on "What Makes A Good Lecturer?" .....

ould be a Lecturer.....

Idea of education is to unsettle the minds of the young and inflame their intellects. ~Robert Maynard Hutchins

## KNOWLEDGE MADE EASY!!!

I always wonder why is do we struggle going to school and college until we find a way to live!!! Aim of education is the pursuit of knowledge. Is life so goal oriented, can't we have an education system that teaches us life? The education system is to groom ourselves in this society, but where is that we are implementing it..!

After all, we are social animals in this world which is pre-occupied by many things that holds us back. Tradition, customs, discrimination are pillars even in providing sources. Learning is never success based. But today's corporate education has made this true. It's all in the young blood to realize the long term results with such education that includes "merit with race" but not "knowledge which teaches them life", to improve the worth of practicality and professional mind system.

"Only an educator who knows the value of transmitting the information in a utilized way"

"Edutainment" is used as a tool to bring a purposeful change in the young minds and improve social change. It can be defined as a "modern art of learning the concepts within a short period that includes meaningful criteria". It's teaching based on amusement, and to build a character that involves awareness, independence, values and individuality.

### Erin Gruwell's Education Project:-

**The Freedom Writers Diary** is the amazing true story of strength, courage, and achievement in the face of adversity at Woodrow Wilson High schools in Long Beach, California. An idealistic twenty-four-year-old teacher named **Erin Gruwell** faced her first group of students, dubbed by the administration as "unreachable, at-risk" teenagers. In the first few weeks of class, the students made it clear that they were not interested in what their teacher had to say, and made bets about how long she would last in their classroom.

Then a pivotal moment changed their lives forever.

Miss Gruwell motivated the students with her enormous plans of teaching techniques that were merely by edutainment.

After realizing her students were all too familiar with violence, she introduced them to "Night" by Elie Wiesel, "Anne Frank: The Diary of a Young Girl" and "Zlata's Diary: A Child's Life in Sarajevo". They have then started comparing themselves to the characters and started penning down their own stories of all they have faced as advised by Erin.

From the moment they named themselves, "The Freedom Writers," in honor of the Civil Rights leaders. The students of Room 203 changed from a group of apathetic, frustrated students to a closely knit, motivated family.

She improved their lives both academically and socially which is a remarkable achievement!!!

"I hope the same achievement can be attained in rural areas of India and also in cities to stop the system of race inheriting practical knowledge in every student."

*Sai Priya( II CSE)*

Too often we give children answers to remember rather than problems to solve. ~Roger Lewin

In today's fast paced world, education needs to be more than just book study. Career prospects need to hit the ground and be well acclimatized to their chosen career path. History shows us that hands on learning in a particular field offers the best training for people new to a career.

## Internships are the way to go!

Many companies are enthusiastic to offer a fair pay to their interns, so you can make money while learning. The possibilities are endless for interns to learn valuable new skills and discover their true talents. With an internship, you can really get a feel for your chosen field.

The benefit to an internship is also that it carries the possibility of a

full time position with the company once your internship is complete. Take charge of your education and your future today! Choose an internship in the field of your choice and reap the unlimited benefits that come with firsthand experience.

## YOUR VIEWS WITH OUR VOICE...!!!

Are you bored of theoretical knowledge?? Always had a thirst for practical knowledge?? But couldn't gain it due to the prevailing education system or due to the advice of your parents or society?? Has it always been just academics and no entertainment..!!

Then here is the column for you to express your future dreams and ambitions..!!

Most of us wish freedom from this theoretical education. Right from our school days people keep saying us "if you perform best in your boards your life will become a cake walk and you can freely move on your interests." And we listen to them thinking that they are experienced and follow this as a rule of life leaving all our fascinations aside. After passing our 10th with flying colors comes are intermediate. And again people bound us by saying "struggle just for two years and get a top rank in EAMCET and that will make your life easier." They make us believe

that EAMCET is like our "aim set" and then we enter into engineering. Every student has many hopes with it who comes with a thinking to balance his life and make it a combination of work and play. Because they know "all work and no play makes jack a dull boy." In the starting "all izz well" but as the days pass by, we face the same stress, the same struggle and the same restrictions as earlier. Our life

has become a process, a daily routine. And we all just follow what our elders did. Because they are settled now after following this system and we tend to follow/do the same.

"Struggle for these four years and passing out as a graduate with few good credentials will of course give us a lavishing job with mind-blowing salary." But this rat race never ends though our life does. At the end there's no gain but just few certificates and no fun. The point is why we just follow what everybody usually does and don't create a new

different career path to make a difference?? Why don't we listen to ourselves and run our life? Why don't we understand that this chance never comes back? "Whatever you wish to do. Do it from today. From now" So friends if you feel your story is similar, if you have something else in mind after the completion of your course If you have an amazing, exciting or a different plan for your life and career ahead. Then go on jot down your future plans.

*"Your children are not your children they are the sons and daughters of life's longing for itself. You can give them your love but you cannot give them your thoughts as they have their own thoughts...!"*

*By Khalil Gibran.*

They say that we are better educated than our parents' generation. What they mean is that we go to school longer. It is not the same thing. ~Richard Yates

**TEENAGE IS A MIXED BAG OF CONFUSION AND EXCITEMENT,  
BUT NEVERTHELESS WONDERFULL!!!**

Still half an hour-- I told myself looking at the clock. Suddenly I realized that my teenage is going to end in thirty minutes and I will be stepping out of those wonderful years of life that will never come back. The very thought of jumping into the twenties is giving me a more matured look and thinking. I realized how I would miss those golden days. Ah! those nineteen years!

It was obvious to go back to the first day, I entered into teens, with restrictions around and those prying eyes of teachers the first teen year was in school. It was a feeling that I wanted to share with my parents, friends and to the society shouting aloud that it's special for me. There was more excitement to life than studies, but academics still domi-

nated those feelings. I just can't forget the smile on my lips when I felt liberated from school and entered college life at seventeen. The first day of college was perhaps a bit more exciting than the first day of teens. Meeting new friends and the initial hiccups paving way for communication among us added more excitement to teenage.

Establishing communication with classmates who posed more like rebels was difficult initially. But as time moved, we became good friends, and yet it was another beautiful stage of teen life. Examinations arrived bringing tension and so did the results, leading to the fall in my pocket money.

Soon we turned into seniors and welcomed the juniors ragging them (of course not insulting or harassing them). But still complaints followed and so did warnings from the administration. Parties, long rides, bunks were numerous infusing the teenage with lots of memories. Now, as I step into my twenties and just 2 years to complete my college, I miss those teens because they were the base of those wonderful years of life and I want to build an exciting future that will be no less than those wonderful teen years.

## 26/11 - THE UNTOLD TALE

A gentle breeze blew as it carried  
The stench of the blood smeared flesh,  
Painless it was for me  
Clad in Iron stuffed with  
The power to kill!  
A bullet I am, just a heart less bullet.  
Agony in its pristine form is what I am .  
A rain of me and myriad similar  
So eager to find a victim and deplume the innocent flesh.

Man is as clever as he can ever be  
Creating soul-less beings, to carry out heart sobbing deeds  
I am innocent to kill

I live and in guilty I die  
none to share the notions hidden from the human eye.

Oh! the omnipresent power  
May this loss be of some use  
May the power of heart overpower the ego of thought with a scintillation of hope I leave.  
To relive in the Blood of such a great being.

Abhinav Karthik  
ECE 2nd year

## SECRET OF SUCCESS- PUNCTUALITY

*Doing things the right way series :*

*Forget everything in the past. If you are very clear and concerned about today, and care for the present, you will find tomorrow taking care of self splendidly. You can face the next day with hope and faith. If you tackle today with enthusiasm, interest and enjoyment, you will face the reality bold enough to it is you who makes your des- tiny, shaping your life and de- ciding your fate. If you want to do something, definitely you can. Whatever you want to do, you will get.*

*Just learn the secrets of things doing...the RIGHT WAY!!*

*Move with ..TIK...TIK...TIK*

*"We have short time to stay, as you,  
We have as short a spring,  
As quick a growth to meet Decay "*

## Our AVISHKAR Our Way

The purpose of writing this article is to share our views of what "AVISHKAR" is all about. Avishkar-the name itself makes it meaning loud and clear and creates an enthusiasm. When the team Avishkar started promoting this, it inspired all of us. This was the first event in our college for the first years. Very few colleges provide this opportunity for the first years to present their papers. As we were new, the team Avishkar guided and helped us all through. The intra college event was a huge success as many participants turned on for it. It makes us feel proud to know our hidden talents. The inter college event which was a state level paper presentation wherein we had participants from other colleges. They were

warm-heartedly welcomed and we are sure that the hospitality of team Avishkar must have touched their hearts. This competition was fair enough, thanks to the jury members. We really couldn't find any lapses or loopholes in the arrangements that were made by our seniors.

The most exciting is to share our personal experience, AVISHKAR made us learn a lot in this process and gave us the feeling that we are on our way to become "technocrats". the team Avishkar was always beside us to lend us a helping hand whenever we needed them from the selection of our topic, through dealing with PowerPoint to making a good presentation. To put our heads high and to bring our college on

the top, we gave our best in the presentation. Resulting in we being the toppers in the inter college event and the whole credit goes to the Team Avishkar. Many of us would accept that they had explored and discovered the hidden talents in us and in this process, They left no stones unturned. We can never repay the selfless 24X7 service rendered by them. There are no words to express our gratitude. But to say "HATS OFF" TEAM AVISHKAR.

## AVISHKAR — MY EXPERIENCES

I, Akash and my friend, Navin wanted to participate in Avishkar. But before couple of days for the intra college competition we withdrew because of fear, whether we could do it or not. But one day before of the event a senior from the Avishkar team guided my friend to participate in this, and encouraged us not to miss a chance like this. So with that assurance of participation we submitted our PPT. We stood in the 8<sup>th</sup> position. We're really thankful to the

senior who encouraged us and made me a proud vbitian. Because of Avishkar I let my fear go away. So I hereby convey all the juniors to have a positive attitude and to never let their opportunities go down for fear!!! Try and try and till you succeed. I thank all the Avishkar team members and faculty of VBIT for giving me this chance to participate.

Every individual possesses a special talent and it comes out only when we express our views

and share it. Communication skill plays a vital role in expressing. So participating in such events even one is not good at communication helps how to face the audience, using the stage as source of ideas projecting it in a way that is needed. Winning a prize is not important as participation is. All the best to all and do utilize these kinds of opportunities.
